

This folder contains the shapefiles for the October 2010 East Severity Scale (FNFIS). The FNFIS was used by FEWS NET prior to April 2011. This scale was similar to the IPC but with some differences in classification criteria.

The folder includes shapefiles for the three periods of analysis:

EA_201010_CS	Current food security outcomes for October 2010
EA_201010_ML1	Most likely food security outcomes for October 2010 – December 2010
EA_201010_ML2	Most likely food security outcomes for January 2011 – March 2011

Within the shapefiles, the CS/ML1/ML2 fields contain the FNFIS area phase classification for the outlook period. The FNFIS_Legend.lyr file is provided for reference. It contains the official FNFIS color scheme.
